

## **Appendix D**

### **Hazardous Waste Satellite Accumulation Area Rules and Responsibilities**

1. Never accumulate more than 55 gallons of hazardous waste or more than 1 quart of acutely hazardous waste on site.
2. The generator will provide the necessary containers for waste accumulation.
3. All waste containers must be labeled with approved waste description tags or labels
4. The container label must contain the words, “Hazardous Waste” and a description of the hazards of the contents of the container.
5. Satellite Accumulation areas must comply with preparedness, prevention, contingency plan, and emergency procedures.
6. If one or more generator shares the same satellite area, each generator is responsible for their waste.
7. For questions regarding waste determination, lab cleanouts or training contact the University Risk Management and Environmental Safety Office (3-3445) or by email at [Gordon.Krueger@uni.edu](mailto:Gordon.Krueger@uni.edu).
